"HARVEST STARTS HERE."

AUTO-RESET OR SHEAR BOLT SHANKS • ADJUSTABLE GAUGE WHEEL • HIGH-TENSILE WALL TUBING

The Great Plains Inline Sub-Soiler is designed to eliminate yield-robbing compaction layers created by horizontal tillage tools such as plows, disks, and sweep implements. Sub-Soilers are available in four models and two shank options – all with PEER® Maintenance-Free Bearings.

TERRAINFLEX

PIVOTING WALKING BEAM

Improve the performance of your 1850, 1860 or 1890 air drill.

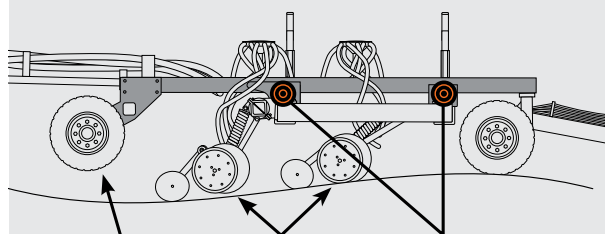

The *TerrainFlex* by Applequist Manufacturing, Inc. was created to address issues with 30', 36', 40' and 42' three-section 1850, 1860, and 1890 Air Drills on uneven terrain.

With the *TerrainFlex* Pivoting Walking Beam installed, the gauge wheels allow the wing frames to better follow the contours of the field. When the wheels have more contact with the ground, the results are less downtime due to machine breakdowns and a more consistent seed placement from the openers. An optional weight kit is also available.

THE BEST KEEPS GETTING BETTER

THE
GREAT PLAINS BD7600

How do you make the best even better?

Add the ability to change fertilizer rates and seeding rates individually with a touch of a button – or automatically with variable-rate prescription maps. Our DrillCommand® software, coupled with hydraulic drive on split-box configurations, gives producers capabilities never before available on a box drill.

Combine this practical technology with the BD7600's long list of industry-leading features, and you have the most productive, versatile, and operator-friendly box drill ever produced!

With over 40 years of hard work, commitment to agronomic research, and listening to farmers' feedback, Great Plains has developed innovative equipment to propel your operation into greatness, and transform the way you farm.
