WHEN MIKE LEVESCY SWITCHED TO VERMEER® NET, HE SAID

GOODBYE TO MOLDY BALES.

HIS SECOND-YEAR BALES ARE NOW BETTER PROTECTED.

Custom hay producer Mike Levescy likes to hold back 20% of his bale supply every year in case his area experiences a drought. His previous netwrap kept falling apart and rotting the bottom of his stored bales, but after switching to Vermeer® Net, he doesn't have that issue anymore. With Vermeer Net — made with heavy-duty, high-density polyethylene (HDPE) for added durability — Levescy can wrap a bale tighter to shed more water for reduced hay loss while in storage. His second-year hay is now better protected and holds together when hauled to feed cattle. Learn more at makinhay.com/mike

THE
GREAT PLAINS BD7600

How do you make the best even better?

Add the ability to change fertilizer rates and seeding rates individually with a touch of a button – or automatically with variable-rate prescription maps. Our DrillCommand® software, coupled with hydraulic drive on split-box configurations, gives producers capabilities never before available on a box drill.

Combine this practical technology with the BD7600's long list of industry-leading features, and you have the most productive, versatile, and operator-friendly box drill ever produced!

With over 40 years of hard work, commitment to agronomic research, and listening to farmers' feedback, Great Plains has developed innovative equipment to propel your operation into greatness, and transform the way you farm.
